

July 2026

Final Press Release

SicherheitsExpo Munich 2026 – The meeting place for decision-makers in the security sector in the south

The SicherheitsExpo Munich 2026 focused on current topics, developments and trends in security technology over the course of two days. The trade fair impressed with high-calibre specialist presentations, renowned exhibitors and a high concentration of decision-makers who had specifically prepared for their visit. Both exhibitors and visitors expressed great satisfaction with this year's SicherheitsExpo Munich. The next edition of the SicherheitsExpo Munich will take place on 30 June and 1 July 2027 at the MOC Munich.

Munich – Around 3,500 visitors attended the SicherheitsExpo Munich 2026 to explore what the more than 120 exhibitors had to offer. The two specialist forums and the networking opportunities were very well received. This year, the SicherheitsExpo München saw an increase in exhibition space and also welcomed more visitors than at the previous event. This means that the growth seen in recent years at the SicherheitsExpo München is continuing at a healthy pace.

The initial survey of exhibitors made it clear that SicherheitsExpo Munich once again stood out for the high calibre of its trade visitors and the very high proportion of decision-makers in attendance. Purchasing decisions were made and business deals were concluded directly at the trade fair.

124 exhibitors took the opportunity to present their services and solutions to an industry audience over the two days of the SicherheitsExpo Munich. For many companies, the trade fair thus provided a good platform for networking with existing and new business partners. Some exhibitors have already registered for next year's event.

Bavaria's Minister for the Interior, Joachim Herrmann, opened the SicherheitsExpo Munich and, following his opening address, took the time to visit the exhibition: "The innovative and forward-looking range of products and services, as well as the exhibitors' high level of technical expertise, have been the hallmarks of the SicherheitsExpo in Munich for many years. First-hand information and professional exchanges of the highest standard are guaranteed here. The exhibition thus offers a valuable platform for gaining comprehensive insights into the latest developments in security technology and for finding new inspiration for practical applications."

Top-class specialist presentations on highly topical subjects

At the accompanying specialist forum, exhibiting companies had the opportunity to present their products and solutions to an interested audience and to attract further customers with a concrete interest in investing to their stand. In addition, the Federal Association for the Protection of Critical Infrastructure (BSKI) organised a further specialist forum featuring presentations on security and KRITIS-related topics. Both specialist forums were consistently very well attended, and visitors showed great interest in the specialist topics presented. The stage programme is to be expanded for the upcoming event in order to further focus on knowledge transfer.

VON ZUR MÜHLEN'SCHE GmbH was present as an exhibitor at SicherheitsExpo, and the company is very satisfied with its participation in Munich: "The SicherheitsExpo 2026 lived up to our expectations. We held in-depth discussions with well-prepared visitors both at our stand and during our two specialist presentations. This confirms that topics such as KRITIS, resilience and holistic security planning are currently of great concern to many decision-makers. For us, the SicherheitsExpo remains an important platform for professional exchange," said Alice M.W. Hoffmann. Dussmann Service Deutschland also gave a positive assessment of its participation at the event in Munich: "SicherheitsExpo 2026 was an all-round success for us. The trade fair was superbly organised, offered plenty of interesting professional discussions and provided a pleasant atmosphere for networking with existing and new contacts. Many thanks to the entire trade fair team – we'd love to come back!"

The managing directors of the trade fair organiser AFAG, Henning and Thilo Könicke, view the fair's development positively: "SicherheitsExpo Munich has been firmly established in the industry for over 20 years and has seen steady growth. This shows that both the topics covered by the trade fair are in high demand and that the format of the event meets the industry's needs. This bodes very well for the other security trade fairs this year, and we look forward to meeting the industry again in mid-July at KRIFA in Münster and in October at the SicherheitsExpo Alpe Adria in Klagenfurt."

Outlook for the SicherheitsExpo trade fair year

This year's calendar features various security trade fairs organised by AFAG, which will focus on the latest developments, key issues and forward-looking solutions at different venues: the SicherheitsExpo Munich kicked things off, and shortly afterwards, on 15 and 16 July, KRIFA Münster – a specialist conference on security and crisis preparedness, accompanied by an exhibition – will take place. On 14 and 15 October, the SicherheitsExpo Alpe Adria will take place for the first time at the Klagenfurt Exhibition Centre (Austria). The BOS:EXPO will make its debut in Augsburg from 25 to 27 February 2027. The next edition of the SicherheitsExpo Munich will take place on 30 June and 1 July 2027. Next year, the SicherheitsExpo Berlin will also take place once again.
